ecoliLeucine *AffyBatch instance ecoliLeucine*

Description

The *Leucine-responsive regulatory protein* (Lrp) is thought to regulate the expression of multiple
genes and operons in bacteria. Two strains *lrp+* and *lrp-* were studied to investigate which genes
are subject to changes in expression levels.

The raw data were taken from CyberT website. The data for 8 chips (4 *lrp+* and 4 *lrp-*).

1

Format

An `AffyBatch` of 8 samples.
