

# Package ‘chromstaRData’

October 5, 2024

**Type** Package

**Title** CHIP-seq data for Demonstration Purposes

**Version** 1.31.0

**Date** 2016-06

**Author** Aaron Taudt

**Maintainer** Aaron Taudt <aaron.taudt@gmail.com>

**Description** CHIP-seq data for demonstration purposes in the chromstaR package.

**Depends** R (>= 3.3)

**License** GPL-3

**biocViews** Mus\_musculus\_Data, StemCell, ChIPSeqData

**NeedsCompilation** no

**RoxygenNote** 5.0.1

**git\_url** <https://git.bioconductor.org/packages/chromstaRData>

**git\_branch** devel

**git\_last\_commit** 7b0a058

**git\_last\_commit\_date** 2024-04-30

**Repository** Bioconductor 3.20

**Date/Publication** 2024-10-05

## Contents

chromstaRData . . . . .	2
experiment_table . . . . .	2
experiment_table_H4K20me1 . . . . .	2
experiment_table_SHR . . . . .	3
expression_lv . . . . .	3
rn4_chrominfo . . . . .	3
<b>Index</b>	<b>4</b>

---

chromstaRData	<i>ChIP-seq data from the EURATRANS project</i>
---------------	---

---

**Description**

ChIP-seq data from the EURATRANS project for left-ventricle (lv) heart tissue in brown normay (BN) and spontaneous hypertensive rat (SHR). The data was downsampled to chr12 to reduce the file size for demonstration purposes.

**Format**

BED files with aligned reads.

**Source**

[www.euratrans.eu](http://www.euratrans.eu)

---

experiment_table	<i>Experiment data table for EURATRANS example</i>
------------------	--

---

**Description**

Experiment data table for the EURTRANS data sets of left-ventricle (lv) heart tissue for usage in vignette examples of package **chromstaR**.

**Format**

A data.frame with columns 'file', 'mark', 'condition', 'replicate' and 'pairedEndReads'.

---

experiment_table_H4K20me1	<i>Experiment data table for EURATRANS H4K20me1-example</i>
---------------------------	---

---

**Description**

Experiment data table for the EURTRANS H4K20me1 data sets of left-ventricle (lv) heart tissue for usage in vignette examples of package **chromstaR**.

**Format**

A data.frame with columns 'file', 'mark', 'condition', 'replicate' and 'pairedEndReads'.

---

experiment\_table\_SHR *Experiment data table for EURATRANS SHR-example*

---

**Description**

Experiment data table for the EURATRANS data sets of left-ventricle (lv) heart tissue in spontaneous hypertensive rat (SHR) for usage in vignette examples of package **chromstaR**.

**Format**

A data.frame with columns 'file', 'mark', 'condition', 'replicate' and 'pairedEndReads'.

---

expression\_lv *Expression data for the EURATRANS project*

---

**Description**

Expression values for left-ventricle (lv) heart tissue in brown norway (BN) and spontaneous hypertensive rat (SHR).

**Format**

A data.frame with columns 'ensembl\_gene\_id', 'expression\_BN' and 'expression\_SHR'

---

rn4\_chrominfo *Chromosome length information for rn4*

---

**Description**

Chromosome length information for rat assembly rn4.

**Format**

A data.frame with chromosome and length information.

**See Also**
