Package 'TENxPBMCData'

April 9, 2019
Title PBMC data from 10X Genomics
Version 1.0.0
Description Single-cell RNA-seq data for on PBMC cells, generated by 10X Genomics.
License CC BY 4.0
Depends SingleCellExperiment, HDF5Array
Imports AnnotationHub, ExperimentHub
Suggests knitr, BiocStyle, snow, BiocFileCache, BiocParallel
VignetteBuilder knitr
biocViews SequencingData, RNASeqData, ExpressionData, SingleCellData
NeedsCompilation no
git_url https://git.bioconductor.org/packages/TENxPBMCData
git_branch RELEASE_3_8
git_last_commit 6df96d9
git_last_commit_date 2018-10-30
Date/Publication 2019-04-09
Author Kasper D. Hansen [aut], Davide Risso [aut], Stephanie Hicks [aut, cre]
Maintainer Stephanie Hicks <shicks19@jhu.edu></shicks19@jhu.edu>

TENxPBMCData

10X PBMC Data

Description

Various single-cell RNA-seq data on PBMC, generated by 10X Genomics.

Usage

Arguments

dataset

Which PBMC dataset from 10X Genomics should be retrieved?

Details

Single-cell RNA-seq data were generated by 10X Genomics at various times, using different versions of CellRanger, different chemistries and different genome builds. For details, see the 10X website.

We obtained 'filtered' data and generated SingleCellExperiment containers with data stored as an HDF5 Assay.

As rowData we include ENSEMBL and Symbol_TENx which are ENSEMBL gene ID and gene symbol provided by TENx genomics and a remapping of the Ensembl identifier to a Hugo gene symbol as columns Symbol using the org.Hs.eg.db package. The difference between Symbol and Symbol_TENx is that the former has many missing values (for non-protein coding genes) whereas the later is technically not a Hugo gene symbol.

Value

A SingleCellExperiment object with a HDF5Matrix in the counts assay, which contains UMI counts for each gene in each cell. Row- and column-level metadata are also provided.
